VOLUME CONTENTS

January, Number 1

S. Richter, S. Fleischer, M. Aritomi and R. Hampel	1	Transient two-phase flow in arbitrary inclined tubes caused by depressurization of liquid with dissolved gases
N.-H. Kim and K.-K. Choi	17	Nucleate pool boiling on structured enhanced tubes having pores with connecting gaps
G. E. Cossali	29	Radiant heat transfer between grey surfaces: an alternative approach
R. Marek and J. Straub	39	Analysis of the evaporation coefficient and the condensation coefficient of water
M. Choi and K. Cho	55	Effect of the aspect ratio of rectangular channels on the heat transfer and hydrodynamics of paraffin slurry flow
L. H. Liu, H. P. Tan and Q. Z. Yu	63	Inverse radiation problem of sources and emissivities in one-dimentional semitransparent media
I. L. Pioro, D. C. Groeneveld, S. C. Cheng, S. Doerffer, A. Ž. Vasić and Yu. V. Antoshko	73	Comparison of CHF measurements in R-134a cooled tubes and the water CHF look-up table
W.-S. Fu and S.-J. Yang	89	Heat transfer induced by a body moving in opposition to a flowing fluid
K. M. Moon and T. H. Song	99	Numerical simulation of the stability of steadily cooled flowing layer
I. H. Katzarov, Y. B. Arsov, P. Stoyanov, T. Zeuner, A. Buehrig-Polaczek and P. R. Sahm	111	Porosity formation in axi-symmetric castings produced by counter-pressure casting method
X. Luo, W. Roetzel and U. Lüdersen	121	The single-blow transient testing technique considering longitudinal core conduction and fluid dispersion
J. G. Marakis	131	Application of narrow and wide band models for radiative transfer in planar media
I. Golobić and H. Gjerkeš	143	Interactions between laser-activated nucleation sites in pool boiling
H. M. Park and W. S. Jung	155	The Karhunen–Loéve Galerkin method for the inverse natural convection problems
V. Zimparov	169	Extended performance evaluation criteria for enchanced heat transfer surfaces: that transfer through ducts with constant heat flux

P. Peeters, C. C. M. Luuten and M. E. H. van Dongen 181 Transitional droplet growth and diffusion coefficients

Z. L. Yang, T. N. Dinh, R. R. Nourgaliev and B. R. Sehgal 195 Numerical investigation of bubble growth and detachment by the lattice-Boltzmann method

P. K. Sarma, T. Subrahmanyam, V. D. Rao and A. E. Bergles 207 Turbulent film boiling on a horizontal cylinder

P. Furmanski and J. M. Floryan 215 A method of control of transfer processes

Technical notes

W. M. Healy, J. G. Hartley and S. I. Abdel-Khalik 235 Surface wetting effects on the spreading of liquid droplets impacting a solid surface at low Weber numbers

J. W. Liu, D. J. Lee and A. Su 241 Boiling of methanol and HFE-7100 on heated surface covered with a layer of mesh

X.-J. Hu, J.-H. Du, S.-Y. Lei and B.-X. Wang 247 A model for the thermal conductivity of unconsolidated porous media based on capillary pressure–saturation relation

January, Number 2

R. J. Goldstein, E. R. G. Eckert, W. E. Ibele, S. V. Patankar, T. W. Simon, T. H. Kuehn, P. J. Strykowski, K. K. Tamma, A. Bar-Cohen, J. V. R. Heberlein, J. H. Davidson, J. Bischop, F.A. Kulacki, U. Kortshagen and S. Garrick 253 Heat transfer: a review of 1998 literature

M. S. Sadeghipour and Y. P. Razi 367 Natural convection from a confined horizontal cylinder: the optimum distance between the confining walls

D. Pal and Y. K. Joshi 375 Melting in a side heated tall enclosure by a uniformly dissipating heat source

M.-J. Kim, Y.-B. Lee, Y.-K. Kim, B.-H. Choi and H.-Y. Nam 389 Mixed convection in an unequally heated loop: steady solutions

Y. Ma and J. N. Chung 399 A study of bubble dynamics in reduced gravity forced convection boiling

H. G. Fan, H. L. Tsai and S. J. Na 417 Heat transfer and fluid flow in a partially or fully penetrated weld pool in gas tungsten are welding

N. Makkinejad 429 Temperature profile in countercurrent/cocurrent spray towers

Y. Y. Jiang, W. C. Wang, D. Wang and B. X. Wang — 443 — Boiling heat transfer on machined porous surfaces with structural optimization

X. F. Peng, X. P. Lin, D. J. Lee, Y. Yan and B. X. Wang — 457 — Effects of initial molten pool and Marangoni flow on solid melting

A. Silva Telles, E. M. Queiroz and G. Elmor Filho — 471 — Solutions of the extended Graetz problem

G. Hetsroni, J. L. Zakin, Z. Lin, A. Mosyak, E. A. Pancallo and R. Rozenblit — 485 — The effect of surfactants on bubble growth, wall thermal patterns and heat transfer in pool boiling

Technical Note

Y. C. Chen, C. F. Ma, Z. X. Yuan, Z. Z. Xia and Z. Y. Guo — 499 — Heat transfer enhancement with impinging fire surface liquid jets flowing over heated wall coated by a ferrofluid

503 Erratum

February, Number 3

O. G. Martynenko — 505 — Heat and mass transfer bibliography: CIS works

M. Epstein and J. P. Burelbach — 525 — Vertical mixing above a steady circular source of buoyancy

S. Arcidiacono, I. Di Piazza and M. Ciofalo — 537 — Low-Prandtl number natural convection in volumetrically heated rectangular enclosures II. Square cavity, $AR = 1$

V. Zimparov — 551 — Enhancement of heat transfer by a combination of three-start spirally corrugated tubes with a twisted tape

I.-K. Kim and W.-S. Kim — 575 — A hybrid spatial differencing scheme for discrete ordinates method in 2D rectangular enclosures

J. L. Rosales, A. Ortega and J. A. O. Humphrey — 587 — A numerical simulation of the convective heat transfer in confined channel flow past square cylinders: comparison of inline and offset random pairs

M. Chung and R. H. Rangel — 605 — Parametric study of metal droplet deposition and solidification process including contact resistance and undercooling effects

R. Marek and J. Straub — 619 — The origin of thermocapillary convection in subcooled nucleate pool boiling

X. Ye and M. Shimizu — 633 — Augmented longitudinal diffusion in grooved tubes for oscillatory flow

J. Sun, J. P. Longtin and T. F. Irvine Jr. — 645 — Laser-based thermal pulse measurement of liquid thermophysical properties

H. VAN SANTEN, C. R. KLEIJN and H. E. A. VAN DEN AKKER — 659 — On multiple stability of mixed-convection flows in a chemical vapor deposition reactor

H. SAKASHITA and T. KUMADA — 673 — Method for predicting boiling curves of saturated nucleate boiling

Technical Note

J. W. PAEK, B. H. KANG and J. M. HYUN — 683 — An experimental study on cool-down of a heterogeneous porous body in throughflow

689 — Erratum

February, Number 4

B. DENG, W. WU and S. XI — 691 — A near-wall two-equation heat transfer model for wall turbulent flows

A. BEJAN — 699 — The tree of convective heat streams: its thermal insulation function and the predicted 3/4-power relation between body heat loss and body size

J. T. LIR, M. Y. CHANG and T.-F. LIN — 705 — Vortex flow patterns near critical state for onset of convection in air flow through a bottom heated horizontal flat duct

K. H. CHUNG, H. S. KWAK and J. M. HYUN — 721 — Finite-wall effect on buoyant convection in an enclosure with pulsating exterior surface temperature

M. SONG and R. VISKANTA — 733 — Lateral freezing of an anisotropic porous medium saturated with an aqueous salt solution

G. EVANS and R. GREIF — 753 — Characterization of energy transport by mass diffusion including an application to elliptic channel flow

A. PACHECO-VEGA, M. SEN, K. T. YANG and R. L. MCCLAIN — 763 — Neural network analysis of fin-tube refrigerating heat exchange with limited experimental data

B. K. MORI and W. D. BAINES — 771 — Bubble departure from cavities

G. MILIAUSKAS — 785 — Regularities of unsteady radiative conductive heat transfer in evaporating semitransparent liquid droplets

D. M. CHRISTOPHER and B.-X. WANG — 799 — Similarity simulation for Marangoni convection around a vapor bubble during nucleation and growth

C. DEBBISSI, J. ORFI and S. BEN NASRALLAH — 811 — Evaporation of water by free convection in a vertical channel including effects of wall radiative properties

K. BOOMSMA and D. POULIKAKOS — 827 — On the effective thermal conductivity of a three-dimensionally structured fluid-saturated metal foam

H. B. LÖFGREN and H. O. ÅKERSTEDT — 837 — Initial solidification in liquid metal film flow over a moving boundary

J.-T. YANG, J.-D. GU and W.-J. MA 843 Transient cooling effect by wall mass injection after backstep in high temperature flow field

Technical Notes

K. H. KIM, J. M. HYUN and H. S. KWAK 857 Buoyant convection in a side-heated cavity under gravity and oscillations

G. D. MCBAIN 863 Spatial extrema of advected scalars

R. TSAI 867 Aerosol particle transport in a natural convection flow onto a vertical flat plate

A. A. TROSHKO and Y. A. HASSAN 871 Law of the wall for two-phase turbulent boundary layers

D. A. S. REES and I. POP 877 The effect of *g*-jitter on free convection near a stagnation point in a porous medium

A. M. BETHANCOURT, K. KUWAHARA and J. M. HYUN 885 Buoyant convection of a two-layer liquid system in a cavity: effects of property variations

891 Corrigendum

March, Number 5

H. AURACHER, E. HAHNE, K. LUCAS and W. ROETZEL 893 Professor Dr.-Ing. Dr. h.c. mult. K. Stephan on his 70th birthday

S. SIENIUTYCZ 897 Optimal work flux in sequential systems with complex heat exchange
